-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 20 October 2003.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1-11 is/are rejected.
- 7) Claim(s) _____ is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) All b) Some * c) None of:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

This office action is in response to applicant's communication of 10/20/2003.

Currently claims 1-11 are pending and rejected below.

Oath/Declaration

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wyatt et al. (U.S. Patent Number 5,603,706) in view of Christopher et al. (U.S. Patent Number 2,551,315). Wyatt discloses an infusion port apparatus for a vascular infusion apparatus (see figures 18-25, specifically figure 24), with a first post (16) a second post (24), a feeder (108) with a hollow shank (108) received in the second post which can

Art Unit: 3767

receive a needle hub of a syringe, an enlarged portion to prevent over insertion (102,106,124), and further comprising a hook (124) extending from a bottom of the shoulder and buckled to the corner to prevent the feeder from detaching from the post (see figure 24), a blind hole and multiple connecting ratchets (figure 24). Christopher discloses a feeder (figures 2-7) for an infusion device that contains a hollow shank (41), multiple holes (28), a resilient ring (29) which outwardly extends to open multiple holes in the hollow shank when the pressure value in the hollow shank is greater than a resilient force of the resilient ring, an enlarged portion to prevent over insertion (14,18'), protrusion for supporting the ring (50), a shoulder (18, 40) and O-ring mounted in a groove (22), a hook extending from the bottom (element 46 near 10),), a blind hole and multiple connecting ratchets(figure 4 and 6). Further Christopher discloses an annular rib on the resilient ring (47) and annular groove on the feeder (other side of 47 or 50) to prevent the resilient ring from detaching from the feeder. Further both Wyatt and Christopher elements are fully capable of satisfying all spatial, functional, operational claim limitations.

Wyatt discloses the claimed invention except for the valve/resilient ring connection. Christopher teaches that it is known to use a valve/resilient ring connection as set forth in paragraphs beginning at columns 1-5, to provide a one way fluid path in an infusion system by a simple and inexpensive manufacture means. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the infusion system as taught by Wyatt with a valve/resilient ring connection as taught by Christopher, since such a modification would provide the infusion system

Art Unit: 3767

with a valve/resilient ring connection for providing a one way fluid path in an infusion system by a simple and inexpensive manufacture means.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gray whose telephone number is (571) 272-7180. The examiner can normally be reached on Monday through Friday, 8:30 a.m. to 4:30 p.m. EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Sirmons can be reached on (571) 272-4965. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
